

COMBIT

Value Added Engineering

Combit AB
Reshaping the future of the oil and gas industry.

Combit is a well respected and reputable provider of products and engineering services in the oil and gas industry, providing & integrating products & engineering services, adding value through the entire lifecycle of oil & gas installations. Our experience spans from exploration and development, through production and refining and finally to blending and distribution of the final products. From developing breakthrough technologies and constructing monumental infrastructure projects, to managing logistics for large operations, Combit is reshaping the future of the oil and gas industry.

All brands, product names and company names mentioned herein are, or may be trademarks or registered trademarks of their respective holders.

Continuous innovations for over a decade

Continuous dynamic development is a way of life at Combit and our team's creative energy is the driving force of this development. Combit has enterprise specialising in innovative technologies and solutions that exceed customers' needs and expectations. With close to two decades of experience, Combit is confident that each endeavor will succeed and our top priority is our customers' satisfaction and trust. For us it is a point of honour that every single project is completed successfully. From the very beginning, Combit's experts have found inspiration in the technically challenging tasks of the oil and gas industry and we are always ready for innovative breakthrough solutions. The Combit team is sincerely grateful to all our customers and partners for their steady support, allowing us to implement a wide range of variety of projects and strengthen Combit's standing as one of the leaders in the oil and gas industry.

Vladimir Zelikov

Chairman and Chief Executive Officer

Combit AB

Value added engineering

To succeed in today's global oil and gas industry, highly efficient production is required to ensure competitiveness from the start and during the entire life of a facility. It is also essential to maximise productivity throughout the entire operation, which can only be achieved with integrated solutions that address every aspect of plant operations.

Combit offers a complete range of services, including engineering, integration and servicing of different products, systems and technologies. By combining our industry-specific expertise with our in-depth knowledge of customer processes, we can help you to optimise your operations. We create intelligent facility solutions by integrating software applications and plant information across your entire operation, from production to management level.

A complete product portfolio

With Combit, you can expect a complete range of products and systems for all electrical, control, safety and communications

needs, including field instrumentation and control equipment, power supply and distribution equipment, high-performance compressors and power generation equipment, integrated communications, remote control networks and distributed control systems and much more.

With you all the way

Our solutions integrate every key aspect of your operation. Firstly, we integrate your technological resources to ensure that everything from production process management to enterprise level planning is optimised through integral data flows, prepared and displayed in real time according to individual decision-making requirements.

Secondly, we provide continuity from suppliers all the way to your final end users, applying sophisticated supply chain automation solutions.

Thirdly, we additionally optimise your enterprise over time by providing after sales and support services that ensure performance will remain at competitive levels

throughout the entire life cycle of your plant. From the initial planning phases all the way through facility upgrades, revamps and modernisation to eventual decommissioning, we work with you as your business partner ensuring that you always have the competitive edge you need.

Offering broad expertise

Few other providers are able to offer the oil and gas industry such a wide variety of products and services - from the instrument level up to completely integrated solutions. Our extensive technological portfolio encompasses products, services and solutions from instrumentation, analytics, process control, automation engineering and industry-specific IT solutions to power supply systems, turbine engines, electrical drives, compressors and heat & power solutions.

Our commitment to innovation and process optimization enables us to drive technological development and provides the basis for our business solutions.

Reliable.

A dependable partner at all times

Your processes must function reliably, efficiently and safely, whether upstream midstream or downstream; from production and transport through refining and further processing. With each step you take, at every stage of production, with Combit you have a partner who understands your requirements and delivers customised solutions using the industry knowledge and experience you need.

From single equipment delivery to large-scale projects such as pipeline or complete terminals, we're your partner. Our business ethics reflect an uncompromising commitment to customer satisfaction and environmental responsibility.

A Trendsetter in Innovation

Innovation has always been one of the most important elements in Combit's business strategy. Innovations help the company cut costs, increase sales and achieve higher earnings. Nowadays, those who fail to launch the right new product or technology on the market at the right time will suffer more severely than ever before. As we introduce the latest technology, we ensure steady progress by continuously searching for new solutions, and opportunities to apply partially

completed products, which have never before been introduced in oil production.

Identifying technologies with major growth potential, recognizing technological breakthroughs, anticipating future customer needs and new business opportunities - our experts are doing all of these things in a systematic process designed to make Combit a trendsetter in as many business fields as possible. We all know that sometimes purchasing proven technology, can mean investing in outdated equipment while investing in new technologies, can increase the level of risk. As a result, we carry out thorough tests of new equipment on site and customers only pay when they are completely satisfied with the results, an approach profitable for all parties concerned.

The Absolute highest Level of Support

In order to maintain and improve the performance of your facility over its entire lifecycle, you need service experts with a deep understanding of your business and your production processes. At Combit, we know that commissioning is not the end of our responsibility, but rather the start of a partnership that will last

throughout the lifecycle of your plant. We contribute our in-depth knowledge and experience to this partnership to create service and support programs that are tailor made for your requirements. Since the first days Combit was established, our priorities have always been uncompromising and we pride ourselves on high quality in all our work and in all the instruments we use.

As a result, Combit has become a highly rated maintenance partner - fulfilling and exceeding the service expectations of customers everywhere.

Tailor Made At Your Requirements

At Combit, we work closely with you to develop specially tailored services and support programs that perfectly match for your operation.

In addition, our equipment and solutions are pre-engineered with an emphasis on modular construction, easy maintainability and quick exchangeability.

We also offer a complete spectrum of maintenance services, including routine inspections, preventive maintenance, and full-scale maintenance - and our programs are always tailored to your specific needs, your location and your resources.

Flexible.

Full compliancy with all standards

To guarantee uninterrupted equipment delivery we have established partners for warranty and routine maintenance close to you as a customer. As a result, we can ensure a rapid emergency response anywhere you need us to be.

We and our partners also work in close collaboration with your experts to jointly identify mission-critical spare parts, and to develop the ideal stocking and logistics plans based on those findings. In addition, our commissioning

experts provide complete training for your service supervisors and maintenance engineers. At Combit, we provide the exact support you need in even the most complex situations with our highly qualified service engineers.

Full compliancy with all standards

Combit fully adopt the ISO 9001 quality assurance standard with full certifications from TUV and enjoys the highest AAA international credit rating from B&D.

Combit's departments operates simultaneously to guarantee a unified project implementation standard to all customers. In addition, Combit comply with the American Petroleum Industry standards, as well as the International Organisation of Legal Metrology certificates of conformity and accuracy when applicable.

Combit also meets all safety norms of the European Committee for Electrotechnical Standardisation as well as the Russian

Federation's GOS standard.

Innovative environmental technology

We believe in the importance of leaving behind an intact environment for future generations. With our innovative technologies and our environmental management system, we are helping to preserve the planet's natural resources in a process that unites environmental protection with advanced technology and business success.

Combit has installed highly sensitive detectors on thousands of oil tanks and pipelines that sense even the smallest crude oil and oil product leak during storage and transportation.

Because we understand the ever-growing importance of environmental friendly technology in the oil industry, we continuously invest funds into development of environmental significance.

Clients

- Transneft JSC
- Rosneft oil group
- YUKOS oil group
- LUKOIL oil group
- RAO GAZPROM
- TNK-BP
- Tatneft oil group
- Bashneft oil group
- Ust-Ilimskii timber production group
- Oskolskii electrometallurgy integrated works
- Belarusneft production association
- KazTransOil NKTN
- Kremenchug oil refinery
- Turkmenbashinskii oil refinery
- Majeikyskii oil refinery
- Ventspils-Nafta
- Tallinn sea port
- Batneftebympeks

Super projects

Combit participated in the largest construction project in modern Russia; construction of the Baltic pipeline system, as well as in international projects, working for Chevron, ABB, Alfons Haar, Caspian Pipeline Consortium, Keenoil, Ventspils Nafta, Latrostrans and others.

Completed contracts

- Furnishing of dozen oil fields and oil custody transfer stations
- Reconstruction of more than 30 pipeline transport facilities
- Reconstruction and modernization of 23 oil refineries
- Construction and reconstruction of port terminals
- Dozens of oil tank farms owned by various oil companies
- Retrofit and refurbishing of many gas processing plants and petrochemical facilities
